

Expect top-notch service from our regionally based management team

Colonial Research Associates was founded by Douglas Stagnaro, who has over 16 years of experience as a clinical research professional managing and auditing Phase I-IV clinical trials in the United States, Canada, South America, Europe and Australia. This global experience taught him that many small biotech, device and pharmaceutical companies struggle internally to move their trials forward with very limited resources. Colonial Research Associates was started as a direct response to fill this market need.

Douglas assembled a very experienced team of experts, the Colonial Research Associates, to provide a comprehensive range of clinical trial services to the industry and to ensure compliance with all federal and local regulations. The team is directed by a group of regional managers who have the flexibility to provide individual, highly personalized services for your locally managed projects.

Cost effective services expedite your progress in Phase I and II clinical trials

As a small pharmaceutical, biotech or device firm, the last thing you want is to run out of funds after successful Phase I and/or Phase II clinical trials.

Colonial Research Associates, Inc. (CRA) is a full service contract research organization that has been helping small firms stretch their dollars so that they are ready to move forward with good clean data to Phase III clinical trials, or to arrange for a lucrative acquisition.

With our strong network of professionals throughout the United States, Canada, South America, Europe and Australia, we can deliver the process, therapeutic and technological expertise you need.

Call us to discuss how we can benefit you at 301-260-7882.
